I think companies will **do badly** because of economic problems. Many companies **do business** in a variety of countries. Many companies **do market research** to find out more about their customers. If I do well I might make more money. The standard of living will **drop** if we have a recession. The company is set to **expand** later in the year and take on more staff. They **export** the product around the world. The product was a complete **flop**. Hardly anyone bought it. Let's get down to business. We can't waste any time. My favourite local café went out of business last winter. Our company hopes to **grow** by 5% next year. The company has branches in many British cities, but the **head office** is in London. Our country **imports** most of its oil. The launch of the new phone is next week. I have to make a decision before the end of the day. The large company *made a los* s for the first time this year. I think my business will make a profit this year. I need to make money quickly. When you make someone redundant it's important to manage it effectively. China *manufactures* many products for the world. You should take them seriously – they mean business. The two companies will **merge** to create one large company. What's in your bag? ~ Mind your own business ! I'm going to a conference, but I'll **mix business with pleasure** and also go sightseeing. What are you thinking about? ~ None of your business . Don't be so nosy! The region **produces** most of the world's supply of oil. Many companies failed because of the **recession** and many people lost their jobs. The company was set up in 1990. The larger company wants to take over our smaller company. I've got some **unfinished business** with the company. I'm still arguing with them. Her **absence** was noted by the teacher. The city is famous for its **abundance** of parks and plazas. Accommodation for tourists can be very expensive in London. Alcoholism is a growing problem as drink becomes cheaper. Vandalism, especially breaking public property, is **antisocial** behaviour. The pilot put the plane on **autopilot** for most of the flight. It's my **belief** that this news story isn't entirely true. Many people in Montreal are **bilingual**; they speak both French and English. **Brotherhood** is sometimes used a general term for the friendship between groups of people. The windows of the president's car are made of **bulletproof** glass. Be careful how you drive! *Childhood* was my favourite time in my life. The coldness hit me as soon as I walked outside. The connection between diet and health is well-known. I live here because of the convenience of the buses and trains. My uncle's **death** was difficult for me. *There are major plans for the development of the town, with 600 new houses.* The average **distance** that commuters in the UK travel to work is 8.5 miles. How easy is it to find **employment** in your city? New York has a huge range of entertainment, from Broadway shows to top sporting events. The **excitement** at the end of the game was amazing. Do you have any *expectations* about what you will learn on this course? The *friendliness* of the people was wonderful – they were so welcoming. The country has elected a new government The *heat* was too much for me. I had to go inside. You might have to tell the doctor your *height* and weight. There are a lot of **homeless** people in this city. The situation is **hopeless**. There's nothing I can do to help. Hunger is a big problem in the country because of the poor harvest. I'm surprised by their **ignorance** about the topic. It's been in the news for weeks.

The *improvement* in the system really helped the company. It's my **intention** to leave the company at the end of the month. Loneliness is often a problem in large cities where people don't know each other. The financial **loss** was a problem for the company. Tokyo is one of the world's megacities . This idea is often **misunderstood**, but it's a very simple idea. There's a chilly modernism in the new concrete buildings. Is that a train? No, it only has one track. It's a monorail. London is a very **multicultural** city, with people of many different races and religions. I don't know my city well, yet. I just know my little neighbourhood The city is completely **overcrowded**. It's difficult to find anywhere to live. **Pollution** is a terrible problem in this city. I'm doing a postgraduate degree in aeronautical engineering. You can help stop **racism** by fighting it. The *silence* in the house was noticeable after the noisy ride home. You need to work harder to lift it – use your full strength. The quickest way to get around New York is on the **subway**. *Success* is more important to me than money. What are your **thoughts** on the subject? The ugliness of the buildings contrasted with the beauty of the nearby countryside. The designers claim that the machines are unbreakable. This part of the city is very poor and underdeveloped. The tap water there is **undrinkable**. We'll take bottled water instead. Your instructions were very useful. Thanks! The area has had problems with antisocial behaviour and vandalism. They were prone to *violence* and aggressive behaviour. My watch is waterproof. I can wear it to go swimming. I was asked about my strengths and weaknesses in my job interview. *My little boy swam the* **width** *of the swimming pool – I was very proud.* He's a famous **astronomer** who predicted the discovery of black holes. The prices here are **astronomical** – let's go somewhere cheaper. I'm interested in **astronomy** and I have a telescope set up in my back garden. You can see the **biological** process as the plant takes in sunlight. She's a very good **biologist**. Her team are developing new medicines. I was quite interested in **biology** at school, especially in ecosystems. The book on plant behaviour followed years of **botanical** research. I'm a **botanist**. My field of study is fruit trees. I study **botany**. I work in a laboratory as well as in greenhouses. The chemical reaction was fast and dangerous. There was a flash of light and lots of smoke. I'm a chemist, but I don't sell medicine. I work in a laboratory. I got good marks on my chemistry exam because I knew the periodic table. This sheep is a **clone** of that sheep. They're absolutely identical. Detecting gravity waves was a major scientific discovery. The **drugs** are used to treat malaria. We need more people to take part in our *experiment*. Will you help us? You have the same brown eyes. ~ Yes, there's a genetic connection there. I'm a **geneticist**. I'm studying how people's genes affect their reaction to medicine. Do you think our **genetics** strongly influence our personality? The human test subjects were used as **guinea pigs** for the new medicine. I'm a scientist. I work in a laboratory. If you push it, it will move. It's a **physical** reaction. *My* colleagues are **physicists**. They're studying quantum theories right now. Are you interested in **physics**? ~ Yes, I'm interested in electromagnetics. *What* **research** *are you doing?* ~ *I'm researching new vaccines.* We need more people who love science and want to have careers as scientists. Have you heard about the latest *scientific* research? Who do you think are the most famous scientists in history? Scientists have to do a lot of tests into the possible side effects of new drugs. Will you do a full test to check there are no side effects from that drug? Have you heard about the new scientific theory in quantum mechanics?

It's final. Despite flying through a storm we arrived **safe and sound**. Well, that report was *short and sweet*. You summed it up well. I'm sick and tired of hearing you complain. I'll be there **sooner or later**. I'm not sure exactly when. The shops stock popular items because of supply and demand. The thunder and lightning are really dramatic. It's a huge storm! Will we finish it on time? ~ I don't know...it's touch and go ! You'll have to wait and see what's for lunch.
